

## POWER GENERATION & DISTRIBUTION

- Easily refill of excavation sites.
- Hydrovac services for power pole placement, including high-risk areas.
- Installation of casings.
- Non-destructive exploratory trenching for duct banks installation.

Our services are less disruptive and invasive than traditional means, work more efficiently in hard-to-reach areas, safely uncover buried utilities and require minimal cleanup upon successful project completion. Additional value-added services mean that you get more, while spending less. Please contact us today for more information!

### Our Power Pros Will Improve Your Productivity

The power pros at HydroExcavators have the knowledge, skills and hands-on experience to help companies increase productivity, enhance existing safety precautions and decrease expenses on power projects both large and small. From hydro excavation and back filling to safe debris disposal and site restoration, our highly trained Hydro-X employees work fast, efficiently and safely, and with respect for the people and environment we encounter. Call us today to customize a plan to meet your specific project needs!

### Our Experience in the Power Industry is Second to None

With more than 60 year of industry experience dealing with everything from emergencies to well-thought-out projects, HydroExcavators has an impressive service portfolio that includes:

- The ability to shift pole holes when utility conflicts arise.
- Assistance in pole installations.

### Key Applications

- Directional drilling test holes
- Pipeline and utility crossings
- Sacrificial anode installation
- Subsurface Utility Engineering (S.U.E.) test holes
- Visual confirmation of buried lines
