## Understanding Firewall Technology for Industrial Cybersecurity

Thursday, March 31, 2016  
2:00 pm EDT

Attend the next Belden webinar to explore diverse types of firewalls and how you can integrate them into your ICS network. Learn how you can enhance the security, robustness and resiliency of your system by reviewing various architectures and the security technologies best suited for each application.

### Key Take Aways:

- Review different types of firewalls for industrial control systems
- Understand how various security mechanisms enhance security
- Learn how different mechanisms work together to enhance plant security
- Learn how new firewalls can be integrated into existing ICS networks
- Discover how multiple firewalls can be managed efficiently

### About the Presenters:

**Prof. Dr. Tobias Heer**, Future Technologies, Belden Core Networking Business – Specializing in network protocol design, security and wireless communications, Heer contributed his expertise to the development and standardization of secure Internet protocols certified by the Internet Engineering Task Force (IETF). He received his doctoral degree from Aachen University, Germany.

**Dr. Oliver Kleineberg**, Manager Advance Development, Belden Core Networking Business – Responsible for Advance Development within Belden's Industrial IT platform, Kleineberg facilitated the 2012-2013 integration of Tofino Security into Belden's Industrial Networking portfolio. He graduated from the Esslingen University of Applied Sciences and holds a PhD in Computer Engineering from the University of Limerick, Ireland.
