

## Industries

Trust 60+ Years of Experience in These Industries:

- Electric Power Companies
- Engineering Firms
- General Construction Contractors
- Industrial/Manufacturing Sites
- VAC Boxes
- Oil & Gas: Upstream, Midstream and Downstream
- Water Utility Companies
- Forestry Sites
- Road Construction or Repair

Your job may be very similar to one of the many sites we've successfully completed. Just ask your Hydro-X representative for references and case studies. We're happy to show off our track record of achievement.

Even if your job is unique, we're confident our team of experts can apply and adapt all we learned from multiple industries to find the perfect resolution for you.

## Serving the Southeastern U.S.

Safety. Excavation. Restoration. Productivity.

## One Stop for All-Inclusive Services

Resolve your underground conflicted areas and make your work site more productive with the complete menu of services from Hydro-X.

- Hydroexcavating
- Dry VAC
- Back Filling
- Dump Trucks
- VAC Boxes
- Traffic Control
- Mini Excavator
- Skid Steer
- Pipe Video Camera
- Safe Debris Disposal
- Site Restoration

## What Is “Hydroexcavation”?

Hydroexcavation is an environmentally protective process that injects highly pressurized water into a target area followed by extraction of soil and other objects with a customized, industrial-strength vacuum. The vacuum transports the debris into a truck-mounted tank for safe transport to a designated disposal site.

## Expertise for Flawless Execution

When it's your job to get the job done, there are no excuses. Hydro-X operators are highly trained professionals who know how to:

- Work Fast
- Work Efficiently
- Work Safely
- Work with Respect for People and the Environment

To customize the work to your site's needs, Hydro-X experts will perform a 360° walkaround, giving you a job specific assessment (JSA) that will drive your project action plan. They'll act as your partners to ensure project success.

## Driven by Four Guiding Principles

Your job is our only job. When Hydro-X is on your site, our only goal is to achieve your goals. To do that, Hydro-X strictly adheres to these four values:

**Safety** – Nothing is more important to us. We start each day with a JSA and “Toolbox Talk,” an on-site safety review with all personnel. We also come prepared with complete personal protection equipment and the training to make sure both the people and the environment are protected at all times.

**Excavation** – Removing what you want removed in the most effective way is the whole reason our company exists. We will do it right.

**Restoration** – Your job isn't finished until your site looks perfect. That's why Hydro-X doesn't stop with just the underground excavation. We have the resources to restore and finish the surface area to your specifications.

**Productivity** – You've got a timeline to meet and you can't afford to be delayed by excavation issues. We come prepared and we do everything possible to keep your schedule moving on time.

## Got an Emergency?

Hydro-X is always on call. Sure, it's great when you can plan ahead. But Mother Nature and accidents happen unexpectedly. Just call us and we'll get our team on site as fast as we can. We have operators and trucks stationed across the Southeastern U.S. for quick, easy access to your location.
